Bengaluru, Karnataka • +91-9108089386 • nachiketh1512@gmail.com • nachiketh.me • linkedin.com/in/Nachiketh-Gowda

PROFESSIONAL SUMMARY

AI-integrated Full-Stack Developer with a B.E. in Artificial Intelligence and Machine Learning (CGPA: 9.1) and 1+ year of experience delivering web applications, WordPress/WooCommerce builds, and no-code automation solutions. Skilled in tools like n8n, Make, and the OpenAI API, with a practical focus on shipping results for real clients. Self-managed, delivery-oriented, and comfortable with remote work. Open to roles in web development, AI automation, operations, or technical support.

TECHNICAL SKILLS

Languages & Markup: Python, JavaScript, HTML5, CSS3, PHP

Frontend Development: React.js, Tailwind CSS, Responsive Design, WordPress, WooCommerce, Component-Based Architecture

Backend Development: Node.js, Flask, REST API Design

Databases: MySQL, Firebase, Oracle

AI & Automation: n8n, Make (Integromat), Zapier, OpenAI API (basic integration), Prompt Engineering, AI-Assisted Development, Chatbot Setup & Deployment

ML / AI Frameworks: TensorFlow, OpenCV, Hugging Face Transformers, Scikit-learn

Digital Marketing & Growth: SEO, AEO, GEO, Keyword Research, Content Optimization

Dev Tools & Version Control: Git, GitHub, VS Code

Cloud & Deployment: Vercel, Netlify, GitHub Pages, cPanel

Remote & Collaboration Tools: Slack, Zoom, Google Workspace, Trello, Notion, WhatsApp Business API

EXPERIENCE

AI-Integrated Full-Stack Developer | **Sevrose Pvt. Ltd.** | *Bengaluru (Contract)* | *Sep 2025 – Feb 2026*

- Designed and developed multiple client websites using WordPress, WooCommerce, and custom HTML/CSS/JS builds, tailored to business requirements across retail and service sectors.
- Integrated AI features and automation workflows — chatbots, inquiry handling, form automation — into client web projects using no-code tools, improving lead response efficiency.
- Managed client communication, gathered requirements, and delivered projects independently with minimal supervision, coordinating primarily via WhatsApp and email.
- Maintained and updated existing client sites post-launch, handling plugin updates, performance fixes, and content changes on a retainer basis.

Freelance Web & Automation Developer | **Independent** | *Remote* | *Jun 2025 – Present*

- Delivered a complete website modernisation project for Savari Holidays — scoped requirements, designed and built a responsive site, and formalised the engagement with a signed service agreement.
- Set up n8n and Make automation workflows for small business clients, connecting CRMs, WhatsApp, and email tools to reduce manual follow-up work.
- Managed all client communication remotely — written briefs, recorded walkthroughs, and structured update messages — keeping projects on track without in-person meetings.

Data Analytics Intern | **Hindustan Aeronautics Limited (HAL)** | *Bengaluru* | *Mar 2025 – Apr 2025*

- Built the Asset-Master Project — a full-stack asset transfer interface using Oracle and Flask, enabling seamless inter-department asset tracking for HAL's internal workspace.
- Designed intuitive UI screens improving usability for non-technical staff; delivered the prototype ahead of schedule using AI-assisted development tools.

PROJECTS

Butler POS | *HTML, Tailwind CSS, JavaScript, Firebase, PHP* | 2026

- Building a SaaS-based Point of Sale system for restaurants, covering table management, order tracking, billing, and kitchen display workflows.
- Architected Firebase-backed real-time data sync for live order updates across front-of-house and kitchen terminals.
- Designed a clean, responsive UI in Tailwind CSS optimised for tablet and touchscreen use.

WhatsApp Automation Platform | *WhatsApp Business API, n8n, Make, Node.js, Firebase* | 2026

- Building an all-in-one WhatsApp business automation tool covering chatbot flows, lead generation, broadcast campaigns, and CRM integration.
- Designed no-code flow builder logic for non-technical business owners to set up automated reply sequences and lead capture without coding.
- Integrates with popular CRMs and Google Sheets for contact management and follow-up tracking.

College Buddy — AI Assistant for Education Institutes | *Python, Flask, OpenAI API, Firebase* | 2026

- Developing a customisable AI assistant platform for colleges and coaching institutes — enabling institutions to deploy a branded chatbot trained on their own content (timetables, syllabus, FAQs).
- Built with a simple CMS-style interface so admin teams can update the knowledge base without technical support.

Real-Time Sign Language Recognition System | *Python, TensorFlow, OpenCV, CNN* | 2024

- Built a real-time sign language detection system achieving 90% accuracy using a custom Convolutional Neural Network.
- Designed an accessibility-first interface with clear visual feedback; used AI-assisted development to iterate rapidly on model architecture.

EDUCATION

B.E. – Artificial Intelligence and Machine Learning | *CGPA: 9.1*

BGS Institute of Technology, B.G. Nagara, Karnataka | 2021 – 2025

CERTIFICATIONS

- Full-Stack Web Development Bootcamp – Udemy (2024)
- Prompt Engineering for Developers – DeepLearning.AI (2025)

ACHIEVEMENTS & HIGHLIGHTS

- Managed end-to-end delivery of multiple client web projects simultaneously — handling scoping, timelines, revisions, and final handoff independently.
- Closed freelance contracts through direct outreach and referrals, handling proposal writing, pricing negotiation, and agreement signing.
- Recognised for innovative problem-solving at a national-level hackathon.
- Organised and led a college-level hackathon with 200+ participants, coordinating sponsors, logistics, and operations end-to-end.
- Consistently shipped projects on schedule using AI-assisted and no-code workflows, demonstrating a bias for practical execution over over-engineering.
